

Butler[®] Conventional Steel Services

Explore the Butler Difference

Combine systems construction efficiencies with the unlimited design freedom of conventional materials for an optimum building solution

Conventional Steel Services

Benefit From a Single-Source Solution

Butler® Conventional Steel Services streamlines the construction process. Collaborate with Butler for a comprehensive structural steel package, including design development, estimating, detailing and fabricating. Involvement in the earliest stages of project planning results in time and cost savings.

Build Without Limitations

A conventional solution encompasses all conventional steel products — ranging from wide-flange beams and bar joists to pipes and tubes. The design possibilities are endless, from special features to multi-story facilities.

Innovate with State-of-the-Art Modeling

For unprecedented accuracy, Butler Conventional Steel Services uses the latest modeling software. This technology ensures efficiencies from estimation to fabrication, even with the most complex structural designs. Provide your project team with reliable data at each stage of construction to ensure high-quality execution.

FREEDOM ALONG WITH FLEXIBILITY.

Conventional Building Pricing-Fast

Finalize your project cost early in the design-build process. We are your designer *and* supplier on conventional building projects.

Competitive Pricing

Butler optimizes by cost more than weight alone. Lower weight does not always produce lowest cost. Plus, you receive competitive pricing through Butler's worldwide purchasing power.

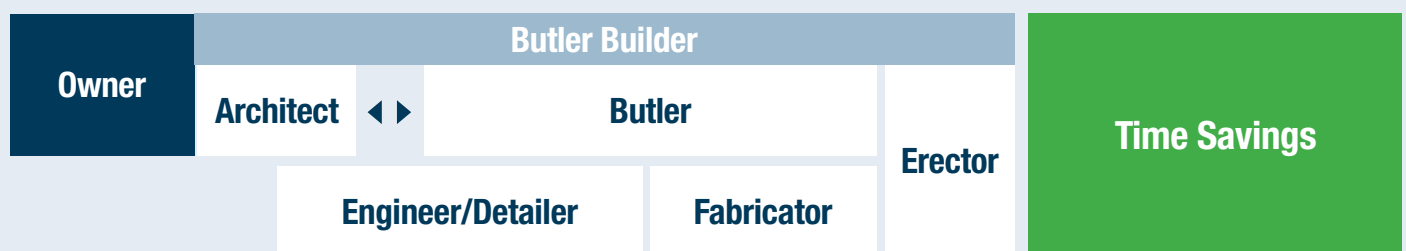

Simplify Construction with High-Quality Materials

Bolted connections are offered as part of every conventional solution, which reduces field-welding labor costs and saves time in construction.

TRADITIONAL DESIGN-BUILD PATH

BUTLER® CONVENTIONAL STEEL SERVICES PATH

Experience the Butler Difference.

Experience the benefits of the world's largest network of construction professionals.

The Butler Builder® network is comprised of more than 1,400 full-service contractors — available from initial concept through final construction to provide a comprehensive combination of design-build construction services with innovative building technology.

Provide your clients with a cost-effective building solution.

Butler Builders can determine how decisions made during the design process impact their customers' operating costs — resulting in more efficient, cost-effective buildings.

Deliver expertise wherever your customers need it.

With Butler's global reach, support your clients anywhere opportunity takes their business.

Butler Builders have resources to navigate the risks of building abroad, getting customers into a market quickly.
